AZƏRBAYCAN TƏHSİL NƏNKƏSİNİN BÖYÜK LİDERİ - HEYDƏR ƏLİYEV

Aygun Mammadova

Xülasə

Ümummilli lider Heydər Əliyevin təhsil siyasəti bu gün islahatların zəruriliyini önəmli diqqət yetirən Prezident İlham Əliyev tərəfindən uurla davam etdirilir. Məhz bu diqqətin və qayımın nəticəsi kimi cənab İlham Əliyevin imzaladığı "Azərbaycan Respublikasında "Bilik günü"nin təsis edilməsi və təhsil müəssisələrində rəhbər rejiminin tənzimlənməsi haqqında" fərmanda "Bilik günü"nin sentyabrın 15-də keçirilməsini xüsusi qeyd etmək lazımdır. Həmin gün respublikanın bütün məktəblərində ilk dəfə rəhbər ümummilli lider Heydər Əliyevin müstəqillik illərində təhsil və gənclər siyasətində sahəsinə gördüyü işlər haqqında yığıncaqların və sənədlərin tərtibatı, uşaqların yavaşca bilik və sənətinə uyğun ölkədə aparılan iqtisadi, siyasi, sosial-önmümlü islahatlar, tarix dönmə qamqlar barədə geniş məlumatlar verilməsi nəzərdə tutulmuşdur.

Açar sözlər: *təhsil, inkişaf, ölkə, siyasət, bilik.*

Today, we remember this genius in every step of our daily life and activities, we meet the good results of his noble and visionary deeds. Heydar Aliyev, along with all his positive characteristics, also had a big heart. He was even able to forgive people who turned against him and betrayed him. For this person, the homeland, the nation, the people were more important than personal ambitions. In his speech as Chairman of the Supreme Soviet on June 15, 1993, he said: "Please, it's time to put aside petty sentiments, it's time to put aside petty gossip, and this is not the time. If someone has ever misbehaved or done something to me, believe me, I forgave them all a long time ago."

The people of Azerbaijan and their individual representatives rightly call Heydar Aliyev a savior. Of course, we are right because the factor of external reaction and internal instability that our nation was exposed to in the 80s and 90s of the last century shows how we escaped from great troubles. The main reason for this salvation was that Heydar Aliyev was always with his people. During the "famous" October events of 1994, the great leader said, "...Now is a very decisive moment for all of us, a decisive moment. Whoever really cares about Azerbaijan should be with us in these decisive moments. "I want to meet you, I expect your help", less than an hour after his appeal to the people,

hundreds of thousands of people roared in the square in front of the Presidential Palace. The power and strength of Heydar Aliyev-People, People-Heydar Aliyev unity is proved by this fact alone. [1, s.1]

The education of the young generation on the basis of modern requirements, raising the knowledge and intellectual level of young people, and their development as perfect specialists and worthy citizens in the future were always on the mind of our great leader. In this sense, 35 years ago, on August 28, 1975, in a meeting with students sent to study outside of Azerbaijan, he said, "You will work in the next decades of this century and the beginning of the next century. It is difficult to imagine today how attractive the horizons of scientific and technical progress will be then." possible. Tomorrow will give you new, high demands. If a specialist is a truly creative personality, he should not just keep up with the times, but always be a little ahead of them. This means that you need to constantly learn, so knowledge, skills, habits "The foundation must be strong" sounds in harmony with the requirements of the current era and modern approaches. Addressing the youth in that speech, he said, "The speed of economic and cultural development, as well as the level of social life of our republic in the future, will ultimately depend on you, the entire current generation of young people, on their skills, abilities, and knowledge," "You must advance the scientific and technical revolution, "You will have to develop science and culture, create new material and spiritual wealth of the society", and with the provisions, our national leader has defined the most necessary task of the education system by drawing special attention to the results of the activities of teachers and educational institutions as a whole.

Even 32 years ago, on May 18, 1978, at the 6th congress of Azerbaijani teachers, "For a very long time, the work of the school was evaluated according to only one indicator, which is considered the main indicator: how many graduates of the school became students and received a university diploma." "The time has come to change this point of view. It is the first duty of the school to train knowledgeable, capable and hardworking people. Is the graduate ready for work - today the efficiency of the work of the school and the entire public education system is determined by this criterion," said our national leader for 21 years. Then, adding to this historical reasoning, he said, "The basis of human education is acquired in high school... If a child does not receive a solid education from the first grade to the end, if he does not prepare well, he cannot go to the university and take the exam. It is not necessary that every high school the student should go to the university and take the exam. This is not possible. It was not possible in the past, and it is not possible today - but it is possible, and even if he does not go to the university and get higher education, he will live in life, he will be active in life, and he will be in society. If he has a fundamental, deep-rooted secondary education, he will find a place for himself in society, work, support himself and his family. But the most important thing is that he will be a proud member of our society", "Now the purpose of our education is to educate the young generation, children and prepare them for the future. But in addition to that, the biggest goal is to prepare an Azerbaijani citizen, to prepare a worthy member of the Azerbaijani society" (from his speech at the meeting with the republic's education workers and students enrolled in higher education institutions on August 31, 1999).

"Each of us, regardless of our academic degree, knowledge, education level, owes all our achievements to the school and the teacher. Each of us has a particle of the teacher's warm heart. I don't know the honorable name of a teacher in the world", said the national leader Heydar Aliyev, during all the years he led Azerbaijan, and he highly valued the work of teachers, treated them with great respect, and took care of improving the financial condition and welfare of educational workers.

Heydar Aliyev signed many decrees on improving the social condition of teachers, awarding them with honorary titles and other state awards during both periods of his leadership in Azerbaijan. All this is a clear manifestation of the Great Leader's appreciation for the teacher's work. [3, s. 4]
